Dr. D.V Kamath and Dr. UC Niranjana from Manipal.Net had conducted a four day session about the latest advancements in electronics industry. They also gave the students an exposure to the latest industry relevant projects in the field of VLSI and analog electronics.

A two day workshop on quantitative aptitude was conducted by Mr. Krishna Moorthy.

In-House Training

The in house faculties conducted refresher courses to all the final year students. Experts from computer science department took quick session on core subjects which is essential for every candidate to have an upper hand in technical rounds during any placement drive.

The placement department of our college conducted Mock interview along with Group discussion session to all the final year students. This session is very essential to uplift a candidate's confidence, understanding do's and don'ts in any interview, enhancing their vocabulary skills. These sessions are repeated throughout the year to help candidates to be confident enough to crack any interviews.

Starting step in any recruitment process is to clear aptitude rounds. To make this effortless for the students, aptitude sessions are included in the curriculum for every student from the 3rd year of their academic course. Every week, 3 hour session includes general aptitude, quantitative and qualitative, reasoning and vocabulary sessions. Hands on session to all the students are made available through Indiabix, which provides mock examination and entrance tests.

Our Placement department is also associated with **CoCubes**, India's largest assessment and hiring platform. CoCubes works with 750+ corporate clients to execute entry level and lateral assessments and has access to more than a million candidates through its platform.
