Departmental Co-ordinators with Dr S M Kulkarni

A One-Day Seminar on “How to write a technical paper” was done by Dr. S M Kulkarni in association with Department of Mechanical Engineering and Civil Engineering. The seminar was conducted for the benefit of faculties of the respective departments and Interested student from UG and PG programs.

The talk was conducted to discuss the importance of writing the technical paper in required manner. He spoke about the way and sequential order of writing the paper. He began with explanation of Abstract writing which is most important and basic part of any technical papers.

Dr S M Kulkarni during his session

The session was highly influential as it covered most of the topics related to writing a paper either as a research scholar or as guide to student. The talk covered very important aspects of the research paper writing like the introduction, literature survey, research methodology, conclusions etc. It also included a session on finding the research papers for writing the review papers.

The session included Faculties and Students from Mechanical Engineering Department. It was beneficial for research scholars who are very much into the research field.
