

Report of Seminar on **Research Culture and writing a Technical Paper**

By

Dr K N Prabhu

Professor

Department of Metallurgical and Materials Engg

NITK Surathkal

Departmental Co-ordinators with Dr. K N Prabhu

A One-Day Seminar on “Research Culture and writing a Technical Paper” was done by Dr K N Prabhu on 23/2/2017 in association with Department of Mechanical Engineering and Civil Engineering. The seminar was conducted for the benefit of faculties of AIET.

The seminar was mostly concentrated on the overall development of the faculty not only as a teaching professional but also as a Research Fellow. He discussed on various aspects of the research and also different fields of research where no one has ever done. He also urged faculties to take up the projects from government and private sector so that there will be an exposure to the work environment.

He also discussed how ancient research were conducted without thinking about the consequences and end results.

Faculty of AIET Present During the session

Dr K N Prabhu During his seminar session

The session was highly influential as it covered most of the topics related to writing a paper either as a research scholar or as guide to student. The talk covered very important aspects of the research paper writing like the introduction, literature survey, research methodology, conclusions etc. It also included a session on finding the research papers for writing the review papers.

The session included Faculties from AIET. It was beneficial for research scholars who are very much into the research field.
