FACULTY DEVELOPMENT PROGRAM

ON

“LITERATURE SURVEY AND
REVIEW PAPERS”

Name of the FDP: Literature Survey and Review Papers

Details of the Resource Person: The resource person for FDP was Dr. Ajith Hebbar, Head of the Department, Department of Civil Engineering, AIET, Moodbidri. He has 8 years of industrial experience and 21 years of teaching experience with the specialization in Environmental Engineering – Industrial Wastewater Treatment Using Low Cost Adsorbents. He has given several talks in various seminars and FDPs on the topics related to research methodology.

Brief Report about FDP: There is always confusion about how is literature survey different from literature review. Reviewing the literature relevant to a given field is a standard part of doing research. There is a standard procedure to conduct a literature survey to write a review article. To explain about the steps of literature survey to write a literature review, AIET conducted one day FDP on **Literature Survey and Review Papers** on 30-06-2021 in Innovation Lab.

Dr. Ajith Hebbar interacting with the faculties during the session

The workshop was conducted for all AIET faculties. 35 faculties from different departments have attended the FDP. He explained a step-by-step approach of literature survey in writing review papers. A literature review is a survey of scholarly sources on a specific topic. It provides an overview of current knowledge, allowing you to identify relevant theories, methods, and gaps in the existing research. Writing a literature review involves finding relevant publications from books and journal articles, critically analyzing them, and explaining what you found. He added - a good literature review doesn't just summarize sources—it analyzes, synthesizes, and critically evaluates to give a clear picture of the state of knowledge on the subject.

After attending this session, the audience got an idea about how to do the literature survey and implement the information to write a review article on any specific topic.
